Our Mottos

(As an individual)

- 1 The most effective learning fits the individual's personality.
- 2 Good health is one's most valuable asset.
- 3 Effort is the key to success.

(As a member of society)

- 1 A person who loves others and himself
- 2 A person who is neither too proud nor too humble
- 3 A person who acts with courage and responsibility

Our Principles

- 1 Sincere heart
- 2 Friendly spirit
- 3 Indomitable will

(Words selected on Feb.25,1966)

College Emblem

Objectives of the College

Education Philosophy

National Institute of Technology, Tomakomai college, through its education, strives to promote enriched humanity, a spirit of autonomy and independence, and facilitates the well-balanced growth of knowledge, morality and health for future engineers, and we train them to contribute to the development of the whole community.

Learning Objectives for Regular Courses

I. Humanity

Students acquire enriched humanity, new knowledge and skills, a spirit of autonomy and independence through the curriculum and extra-curricular subjects and activities.

II. Practical Ability

Students acquire practical skills and study habits that form a foundation of creativity for their future progress and advancement.

III. Global Mind

Students acquire new knowledge and skills, start thinking from a worldwide point of view, and learn fundamental skills for international communication.

Advanced-course objectives

I. Character building

development of character with broad perspectives for effective interaction and contribution to future society.

II. Creativity

basic skills for technological development with multiple viewpoints; specialized and empirical engineering expertise.

III. Worldwide outlooks

cultured mentality, communication skills and a spirit of mutual understanding for active roles in the international arena.

Objectives of the Department

Department of Engineering for Innovation

Department of engineering for innovation aims to develop human resources having a rich sense of humanity, an independent spirit, and a broad vision to create a safe and prosperous future by training various knowledge of the engineering field with practical education.

Objectives of the Courses

Advanced Course of Engineering for Innovation

Cultivation of practical and interdisciplinary skills based on expertise and technology for adaptation to social change with empirical knowledge, and the capacity to play active roles in new fields.

History

Rapid economic growth (Japanese economic miracle) and remarkable technological development in Japan during post-World War II era had led the need for trained technical experts. This leads to the establishment of new type of a higher education institution: National Institute of Technology (NIT). A college of NIT admits students from junior high schools, and trains them following the curriculum of five years. The Tomakomai College was founded in 1964.

30 Dec. 1963	It was decided that there should be a national college of technology in Tomakomai.
1 Apr. 1964	Tomakomai National College of Technology with three departments: mechanical engineering, electrical engineering, and industrial chemistry was founded by Ministry of Education. Dr. MANAI Kouzo, professor at Hokkaido University took office as the first president.
24 Mar. 1965	The first part of school and dormitory building construction was completed.
15 Mar. 1966	The second part of the construction was completed. The construction of the gymnasium also was finished.
20 Nov.	The third part of the construction was completed.
26 Oct. 1967	The anniversary of the founding of the college celebrated.
1 Apr. 1969	The department of Civil Engineering was added.
20 Feb. 1970	The fourth part of the construction was completed.
1 Apr. 1971	Dr. FUKUTOMI Takaharu, professor at Hokkaido University took office as the second president.
15 Mar. 1973	The construction of the Library was completed.
1 Apr.	Dr. OHTSUKA Hiroshi, professor at Hokkaido University took office as the third president.
15 Oct. 1974	The 10th anniversary of the founding of the college celebrated.
25 Dec. 1978	The construction of the second gym was completed.
24 Mar. 1980	The construction of the Lecturer Building was completed.
1 Apr. 1981	Dr. HANZAWA Hiroshi, professor emeritus at Hokkaido University took office as the fourth president.
26 Sep. 1983	The construction of the Welfare Facilities was completed.
11 Mar. 1985	The construction of the fourth dormitory Building was completed.
1 Apr. 1987	The construction of the Media Center was completed.
1 Apr. 1988	Dr. ISHII Tadao, professor emeritus at Hokkaido University took office as the fifth president.
6 Oct. 1989	The 25th anniversary of the founding of the college celebrated.
1 Apr. 1990	The department of Computer Science and Engineering was added.
26 Mar. 1992	The construction of the Computer Science and Engineering Building was completed.
1 Apr.	The curriculum was drastically changed and five-day system came into operation.
1 Apr. 1993	Dr. SAKUMA Tetsuro, professor emeritus at Hokkaido University took office as the sixth president.
28 Apr.	The Association for Tomakomai National College of Technology was founded
1 Apr. 1994	The department of Industrial Chemistry was reorganized into the department of Science and Engineering for Materials.
1 Apr. 1995	The curriculum of the department of Civil Engineering was revised.
26 Feb. 1996	The construction of the Science and Engineering for Materials Laboratory was completed.
1 Apr. 2000	The department name of Electrical Engineering was changed into Electrical and Electronic Engineering.
10 Oct.	The construction of the Community Cooperative Research Center was completed.
1 Apr. 2001	Dr. ITOH Kiyohiko, professor emeritus at Hokkaido University took office as the seventh president.
25 Dec.	The construction of the women's dormitory Building was completed.
1 Apr. 2003	The Advanced Engineering Courses (Electronics and Production Systems Engineering Course, Environmental Systems Engineering Course) were established.
1 Apr. 2004	Tomakomai College transferred under National Institute of Technology. Department of General Education was reorganized as Department of Human and Social Sciences and Department of Natural and Physical Sciences.
25 Sep. 2004	The 40th anniversary of the founding of the college celebrated.
11 Mar. 2005	The construction of the Advanced Engineering Courses Building was completed.
1 Apr. 2007	As part of the restructuring of the administrative section, three divisions (General Affairs Division, Finance Affairs Division, and Students Affairs Division) were reorganized as two divisions (Administration Affairs Division and Student Affairs Division).
1 Apr. 2008	Dr. AKIYAMA Toshihiko, professor emeritus at Asahikawa College took office at the eighth president.
1 Feb. 2009	Support Center (for Engineering and Education) were established.
3 Apr.	Support Center (for Engineering and Education) Office was completed.
26 Mar. 2010	The seminar building was renovated.
26 Dec. 2011	The building of the department of science and engineering for materials was renovated.
25 Jan. 2013	The building of the department of civil engineering was renovated.
1 Apr.	Career education Center were established, and Office was completed.
14 Mar. 2014	Administration building and the building of the department of electric and electronic engineering was renovated.
1 Apr.	Dr. KUROKAWA Kazuya, professor at Center for Advanced Research of Energy & Materials HOKKAIDO UNIVERSITY took office at the ninth president
10 Oct.	The 50th anniversary of the founding of the college celebrated.
31 Mar. 2016	The building of the department of mechanical engineering was renovated.
1 Apr.	All five departments had been recomposed to the Department of Engineering for Innovation.
12 Oct. 2018	Satellite Office (C-base) were established
1 Sep. 2019	Dr. TADANO Shigeru, president at National Institute of Technology (KOSEN), Hakodate College at the tenth president
1 Oct. 2019	Dr. KOBAYASHI Yukinori, professor at Faculty of Engineering Hokkaido University at the eleventh president
23 Mar. 2021	The Library was renovated.
1 Apr. 2021	Re organization from Advanced Engineering Courses (Electronics and Production Systems Engineering Course, Environmental Systems Engineering Course) to Advanced Course of Engineering for Innovation.
15 Mar. 2022	The dormitory (Administration building) was renovated.
14 Nov. 2022	The construction of the ball stop net was completed.
21 Nov. 2022	The construction of the emergency stairs on the Building F (Science and Engineering for Materials Building) was completed.
22 Feb. 2023	Building E (Machine Practical Workshop) was renovated.

Organization

Chronological List of Presidents

	Name	Tenure of Office
1st	MANAI Kouzou	1964 Apr.1 ~1971 Mar.31
2nd	FUKUTOMI Takaharu	1971 Apr.1 ~1973 Mar.31
3rd	OHTSUKA Hiroshi	1973 Apr.1 ~1981 Mar.31
4th	HANZAWA Hiroshi	1981 Apr.1 ~1988 Mar.31
5th	ISHII Tadao	1988 Apr.1 ~1993 Mar.31
6th	SAKUMA Tetsurou	1993 Apr.1 ~2001 Mar.31
7th	ITOH Kiyohiko	2001 Apr.1 ~2008 Mar.31
8th	AKIYAMA Toshihiko	2008 Apr.1 ~2014 Mar.31
9th	KUROKAWA Kazuya	2014 Apr.1 ~2019 Aug.31
10th	TADANO Shigeru	2019 Sep.1 ~2019 Sep.30
11th	KOBAYASHI Yukinori	2019 Oct.1 ~

Executives

President	KOBAYASHI Yukinori
Vice-President (Dean Of Administrative Affairs)	HIRANO Hiroto
Vice-President (Dean Of Academic Affairs)	MATSUDA Kanaho
Vice-President (Dean Of Student Affairs)	SATOH Shin
Vice-President (Dean Of Dormitory Affairs)	IKEDA Shin-ichi
Vice-President (Director Of Advanced Eng.Course)	INAGAWA Kiyoshi
Vice-President (Dean Of Research Affairs)	INAGAWA Kiyoshi
Director of Library and Information Center	MURAMOTO Mitsuru
Director of Community Cooperative Research Center	NAGASAWA Tomoaki
Director of Career Education Center	HATTA Shigemi
Director of Support Center	HIRANO Hiroto
Head of Division of Mechanical Engineering	MITOH Ayumi
Head of Division of Civil Engineering	HATTA Shigemi
Head of Division of Applied Chemistry and Biochemistry	IWANAMI Shunsuke
Head of Division of Electrical and Electronic Engineering	HORI Katsuhiro
Head of Division of Computer Science and Engineering	MIKAMI Tsuyoshi
Head of Division of Humanities and Social Sciences	YAMAGIWA Akitoshi
Head of Division of Natural and Physical Sciences	FUJISHIMA Katsuhiro
Chief of Student Counseling Room	NAKAJIMA Hiroki
Director of Administration Bureau	TAKAMI Moriaki
Director of Administrative Affairs Division	YAMAGUCHI Fumiaki
Director of Student Affairs Division	ISHII Takahiro

Professors Emeritus

Former Position	Name	Presentation Date
President	SAKUMA Tetsurou	2001 Apr.1
Professor	MURAI Kuniaki	2001 Apr.1
Professor	WATANABE Isao	2001 Apr.1
Professor	UENO Masashi	2002 Apr.1
Professor	TANAKA Yoshikatsu	2006 Apr.1
Professor	SASAMURA Yasuaki	2006 Apr.1
Professor	FUJIKI Shigeo	2007 Apr.1
Professor	SUGAWARA Michihiro	2007 Apr.1
President	ITOH Kiyohiko	2008 Apr.1
Professor	AKINO Takahide	2008 Apr.1
Professor	YOSHIDA Takaki	2009 Apr.1
Professor	SATO Yoshinori	2011 Apr.1
Professor	SAWADA Tomoyuki	2011 Apr.1
Professor	MATSUBARA Tomoo	2011 Apr.1
President	AKIYAMA Toshihiko	2014 Apr.1
Professor	FUJII Kiyoshi	2014 Apr.1
Professor	HASEGAWA Hirokazu	2016 Apr.1
Professor	URASHIMA Saburo	2017 Apr.1
Professor	SHIMIZU Yuichi	2018 Apr.1
Professor	YAMAGUCHI Kazumi	2018 Apr.1
Professor	UEKI Masami	2019 Apr.1
Professor	YOSHIMURA Hitoshi	2019 Apr.1
President	KUROKAWA Kazuya	2020 Apr.1
Professor	NAKANO Wataru	2021 Apr.1
Professor	TADENUMA Masami	2021 Apr.1
Professor	KATO Hatsuyoshi	2022 Apr.1
Professor	HASHIMOTO Hisaho	2022 Apr.1
Professor	FURUSAKI Tsuyoshi	2023 Apr.1
Professor	ABE Tsukasa	2023 Apr.1

College Events

First Semester

Apr.1-4	Spring Vacation
Apr.5	Entrance Ceremony
Apr.6	Opening Ceremony, Guidance for Freshmen
Apr.7	First Semester begins
Apr.18	Orientation for 2nd Year Student
Apr.20	Orientation for Freshmen
Apr.20	Foundation Anniversary
Apr.28	Classroom Visitation
May.19	Advanced Engineering Courses Entrance Examination
Late May	Student General Assembly
Jun.2-5	First Semester Term-Mid Examination
Jun.14	Spring Inter-Class Match
Jun.16	Advanced Engineering Courses Entrance Examination
Early Jul	Farewell party
Jul.8-9	Athletic Meet of Hokkaido NIT
Jul.25-Sep.6	Summer Vacation
Aug.5-6	Open Campus
Aug.19-30	Athletic Meet of All-Japan NIT
Aug.21	4th Year Enrollment Examination
Sep.19-22	First Semester Term-End Examination

▲ Entrance Ceremony

▲ Spring Inter-Class Match

Second Semester

Sep.27	Second Semester begins
Oct.21-22	College Festival
Oct.27	Parent-Teacher Meeting
Nov.7-10	Study Tour for 4th Year Student
Nov.9-10	Factory Investigation Tour for 3rd Year Student
Nov.24-27	Second Semester Term-Mid Examination
Dec.12	Winter Inter-Class Match
Dec.25-Jan.5	Winter Vacation
Jan.20	Entrance Examination
Feb.8-14	Second Semester Term-End Examination
Feb.11	Entrance Examination
Feb.16	Ending Ceremony
Feb.22-Mar.31	Year-end Vacation
Mar.15	Commencement Ceremony

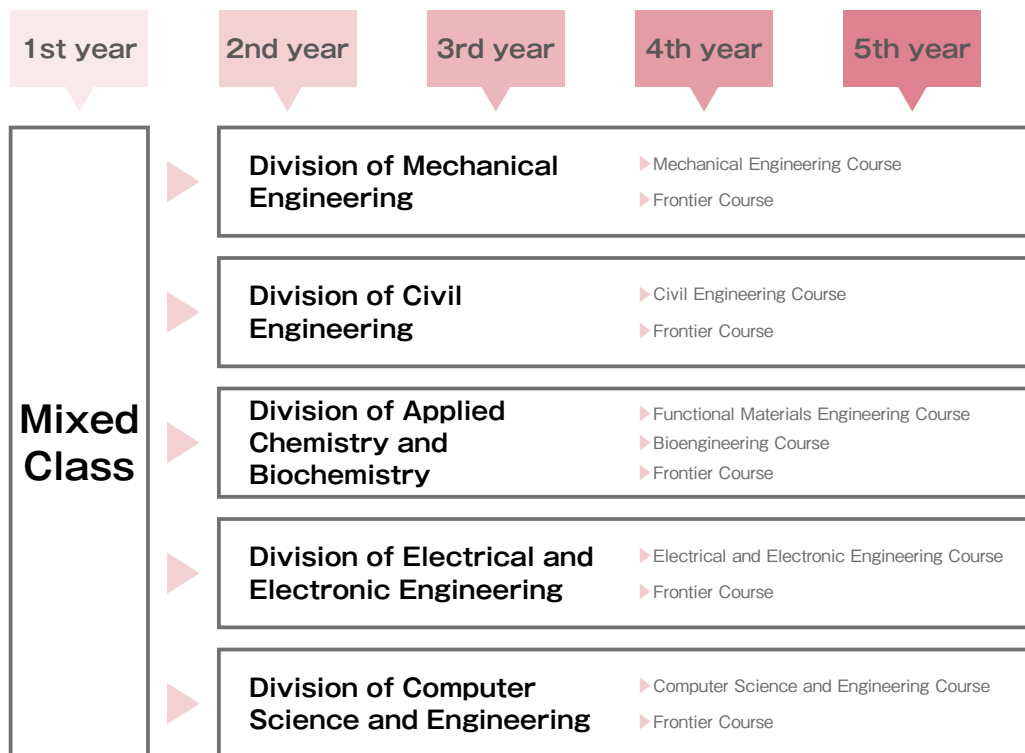

▲ College Festival

In current educational circles, the development of 21st-century skills, or generic skills, is an essential requirement. Additionally, there is a need to cultivate human resources that have an interdisciplinary, broad vision that includes a global and managerial perspective in local businesses and industries. To develop such human resources, the National Institute of Technology (NIT), Tomakomai College, integrated the five traditional engineering departments (mechanical engineering, electrical and electronic engineering, applied chemistry and biochemistry, computer science and engineering, civil engineering) into one department, the Department of Engineering for Innovation, in the 2016 fiscal year. This new department consists of five professional divisions and seven courses aiming to develop creativity in and broaden the perspectives of students. In addition to traditional professional education, the new department in Tomakomai College enhances 21st-century skills of students through systematic "Creativity Education" and "Interdisciplinary Education".

Department of Engineering for Innovation

Admission
quota:200

Division of Mechanical Engineering

Mechanical engineering makes the basis of all industrial technology, and its applicable field is very versatile. The wide field is covered until not only a machine but also a graduate's position reaches food, construction, information, a trading company, and government and municipal offices from the field of material, electricity, electron, and chemistry. In order to bring up the student who adapts himself and can play an active part in this division in any field from such a meaning in the future, it is educating for the purpose of supporting fundamental knowledge and application capability.

Division of Civil Engineering

The purpose of this division is that students master the basic skill and knowledge for creating the infrastructure for living safely and comfortably with keeping environment. And the civil engineers must acquire broad knowledge for adopting improvement of technology in the future as well.

In the early stage, students learn Structural Mechanics, Hydraulics, Soil Mechanics, Surveying, Civil Engineering Materials etc. as basic subjects on civil engineering. Based on these subjects, students learn creating or planning urban and civil life.

Division of Applied Chemistry and Biochemistry

"Chemistry" is keyword in the 21st century.

Our life process and many materials and energy that support our life, are produced from various chemical reactions. We think that the foundation of technology in the future will be material chemistry and biological chemistry.

In this division, students are instructed on related subjects and are educated to have flexible thinking skills and application abilities, in order to cope with the fusion and synthesis of this technology.

Division of Electrical and Electronic Engineering

To produce graduates who will attain careers and higher education that lead to leadership roles in academia, industry and government in the era of technology, the Division of Electrical and Electronic Engineering provides the course of studies for the fundamental and special subjects based on the curriculum of the fields of energy, electronics, and telecommunications. In addition, it also offers practical technological education such as various experiments and trainings and helps students develop problem-solving skills through graduation researches.

Division of Computer Science and Engineering

The purpose of this division is to nurture practical engineers of computer systems and other related technologies. The curriculum is largely composed from fundamentals of information technologies based on computer science, control engineering and computer communication.

The second grade subjects are electrical engineering and programming. The higher-grade subjects are computer science and more practical technologies.

Division of Humanities and Social Sciences and Division of Natural and Physical Sciences

The divisions organize the contents of the curriculum for students to acquire knowledge of liberal arts on the level of senior high school and university. The objectives of the liberal education are to think critically, to communicate effectively, to enhance skills and knowledge in math and science, and to have a proper balance between intelligence and physical strength.

Regular course admissions policy

The National Institute of Technology's Tomakomai College welcomes a wide range of domestic and international students with basic academic abilities in various fields, a passion for learning and diverse qualities. Essential aims include building character and independence, producing engineers with well-balanced expertise, instilling virtue and physical ability, and creating individuals capable of working actively for the public good.

Admission requirements

- A thirst for high-level education and specialist technological expertise
- Interest in manufacturing and a passion for applying abilities toward public contribution
- An inquiring mind and a sense of curiosity for new things

Basic regular-course admissions policy

For referral-based admissions, the comprehensive evaluation of reports, reference documents, letters of self-recommendation and interview results is conducted in consideration of motivation, enthusiasm, aptitude and other factors. Applicants with the qualities and basic academic abilities necessary are selected.

For academic achievement-based admissions, comprehensive evaluation of exam results (with emphasis on mathematics, science and English) and report content is conducted. Applicants with the qualities and basic academic abilities necessary are selected.

For returnee admissions, comprehensive evaluation of exam results, report content and interview results is conducted in consideration of motivation, enthusiasm, aptitude and other factors. Applicants with the qualities and basic academic abilities necessary are selected from among those who have lived overseas.

For transfer admissions, comprehensive evaluation of exam results, report content and interview results is conducted in consideration of motivation, enthusiasm, aptitude and other factors. Applicants with the qualities and basic academic abilities are selected for the relevant division and year.

Applications are invited in consideration of the stipulations provided below.

Mechanical Engineering Division

Students learn about mechanisms and methods of drawing energy from nature and related utilization. The division welcomes students aspiring to create and operate mechanical systems toward a more affluent and dependable future with the following qualities:

- Interest in the development and application of energy, materials and information, and enthusiasm for independent formulation and application of such
- Interest in manufacturing and related mechanisms along with a passion for deeper learning
- A desire for self-improvement and contribution to the public good in harmony with the natural environment

Civil Engineering Division

Students enjoy a wide range of learning opportunities, including fieldwork based on the regional environment, toward the development of facilities and systems supporting safety and convenience. Individuals with the following qualities are invited to apply:

- Interest in the design and construction of bridges, roads and other public structures
- Interest in disaster prevention technology for public safety
- Interest in the design of pleasant environments and landscapes

Applied Chemistry and Biochemistry Division

The division welcomes aspiring chemical engineers seeking to use the principles of chemistry and biochemistry to create environmentally friendly materials for the public good. Individuals with the following qualities are invited to apply:

- Interest in the nature of environmental materials and creatures
- A sound background in science and mathematics and an interest in experimentation
- Ability to proactively and enthusiastically undertake new tasks based on teamwork

Electrical and Electronic Engineering Division

The division welcomes students aspiring to work for the public good based on learning in a wide range of fields including natural energy, robotics, electric automobiles, electronics and information/communication. Individuals with the following qualities are invited to apply:

- Interest in solar/wind and other natural energy sources and robots
- Interest in electrical and electronic engineering
- Interest in the mechanisms behind information transmission

Computer Science and Engineering Division

The division seeks to foster individuals with expertise in the fields of software, hardware, information systems and integration systems to support a highly information-oriented society. Individuals with the following qualities are invited to apply:

- Interest in computers and networks
- Interest in information processing, system design and development using computers
- A desire for public contribution based on expertise in information science and engineering

Regular course diploma policy

Department of Engineering for Innovation

The Department of Engineering for Innovation seeks to increase students' interest in engineering technology, promote essential academic ability in specialist areas and develop communication skills, and to teach core specialties with a broad perspective. This approach is intended to develop creativity and inquisitiveness among individuals with the capacity for learning, consideration and the initiative for problem identification/resolution with a global perspective.

Fourth-year teaching is divided into special courses to develop comprehensive engineering expertise and frontier courses to also develop management ability. In this regard, students fulfilling the requirements listed below and obtaining a predetermined number of credits receive certification.

- Basic science/liberal arts expertise for practical engineering, including mathematical science, data science, and AI
- Fundamental engineering expertise and ability for application and practice in social implementation via experiments, training, exercise and practice
- Capacity to understand the essence of issues and express opinions with an appropriate sense of ethics
- Communication skills and the resourcefulness to understand, respect and work with others
- International familiarity and the initiative for ongoing learning

Division of Mechanical Engineering

The Division of Mechanical Engineering cultivates the ability to play active roles with broad perspectives in the field of mechanical engineering, including design drawing, mechanical design, thermofluid dynamics, engineering, materials, information processing and measurement control, based on the learning targets of the college.

Division of Civil Engineering

The Division of Civil Engineering cultivates the ability to play active roles with broad perspectives in the field of civil engineering, including land surveying, materials, structures, ground, hydraulics, environment, planning, construction, legal matters and design drawing, based on the learning targets of the college.

Division of Applied Chemistry and Biochemistry

The Division of Applied Chemistry and Biochemistry cultivates the ability to play active roles with broad perspectives in the fields of applied chemistry and biochemistry, including organic/inorganic/analytical/physical types, chemical engineering, basic biology and biotechnology, as well as functional materials and food biochemistry, based on the learning targets of the college.

Division of Electrical and Electronic Engineering

The Division of Electrical and Electronic Engineering cultivates the ability to play active roles with broad perspectives in the fields of electrical and electronic engineering, including electric circuits, electromagnetism, electronic circuits, electronic engineering, electric power, measurement, control and communication engineering, based on the learning targets of the college.

Division of Computer Science and Engineering

The Division of Computer Science and Engineering cultivates the ability to play active roles with broad perspectives in the fields of information science and engineering, including programming, software, computer engineering, computer systems, system programming, information communication networks, information mathematics/information theory and integration systems, based on the learning targets of the college.

Regular course curriculum policy

In order to develop the skills listed in the Diploma Policy, general subjects designed to help students develop basic academic skills in the natural sciences and humanities, as well as information processing skills, and specialized subjects designed to cultivate students' practical basic skills in mechanical engineering, civil engineering, applied chemistry and biochemistry, electrical and electronic engineering, and computer science and engineering are provided in the professional divisions.

In addition, each professional division is separated into specialized courses and the Frontier Course at the senior year level. The specialized courses will provide specialized subjects for fostering in-depth knowledge of the engineering field, and the Frontier Courses will provide basic business-related subjects for developing a sense of management in addition to engineering knowledge.

1. For the purpose of enabling students to acquire basic scientific knowledge and knowledge of liberal arts which are necessary for practical engineers:

- (1) Natural science subjects such as mathematics, physics and chemistry, and basic information subjects will be provided and developed through a learning method focused on lectures and exercises, so that students can acquire basic scientific knowledge, including mathematical science, data science, and AI.
- (2) Humanities and social sciences subjects will be provided and developed through a lecture-based learning method, so that students can acquire a broad range of liberal arts.
- (3) In the first year, subjects for introduction to specialties and career education will be provided and developed through a learning method focused on lectures and exercises.

2. For the purpose of enabling students to develop the ability to apply and practice fundamental engineering expertise of each division to social implementation via experiments, training, exercises and practices:

- (1) Specialized subjects corresponding to specialized fields of study will be provided and developed through a learning method focused on lectures and exercises, so that students can acquire fundamental engineering expertise of their division.
- (2) Practical training subjects and subjects conducting problem-solving classes which correspond to specialized fields of study will be provided and developed through a learning method focused on experiments and training, so that students can acquire application and practical skills.
- (3) In senior years, graduation or Frontier research will be provided and developed through a comprehensive learning method.

[Note: Specialized subjects by division]

Mechanical Engineering : Drawing, machine design, mechanics, thermal fluid, machining, materials, information processing, measurement control

Civil Engineering : Surveying, materials, structure, ground, hydraulics, environment, planning, construction, regulations, and drafting

Applied Chemistry and Biochemistry : Organic chemistry, inorganic chemistry, analytical chemistry, physical chemistry, chemical engineering, basic biology, biochemistry, bioengineering, and applied chemistry and biochemistry including functional materials or food chemistry and biochemistry

Electrical and Electronic Engineering : Electrical circuits, electromagnetic, electronic circuits, electronics, electrical power, measurement, control, and communication engineering

Computer Science and Engineering : Programming, software, computer engineering, computer systems, system programs, information and communication networks, information mathematics, information theory, and embedded systems

3. For the purpose of enabling students to develop the ability to understand the true nature of an issue and solve it from proper ethical perspectives:

- (1) Subjects dealing with content related to ethics and engineering ethics will be provided and developed through a lecture-based learning method.
- (2) In senior years, graduation or Frontier studies will be provided and developed through a comprehensive learning method.

4. For the purpose of enabling students to acquire communication skills and the resourcefulness to understand, respect and collaborate with other people:

- (1) Subjects that deepen understanding of behaviors for promoting cooperation and collaboration as a group will be provided and developed through an exercise-based learning method.
- (2) In practical training subjects, a learning method incorporating group work will be developed.

5. International competence and the initiative for ongoing learning

- (1) Foreign language (English) subjects will be provided and developed through a learning method focused on lectures and exercises.
- (2) In senior years, graduation or Frontier research will be provided and voluntary studies and research will be developed.

Policy on grading methods

1. In lecture-based subjects, attainment goals for the subject will be established, regular performance (such as exercises and reports) and results of regular exams will be comprehensively considered, and the level of achievement against the attainment goals will be evaluated.
2. In subjects based on practice, experiments and exercises, regular performance such as assignments, reports and presentations will be comprehensively considered, and the level of achievement against the attainment goals will be evaluated.
3. In the graduation research, papers summarizing research results, presentations, and attitudes toward studies will be comprehensively considered, and the level of achievement against the attainment goals will be evaluated.

Grading and evaluation criteria

Grades are based on a 100-point scale, with 60 points or higher being considered successful and the prescribed credits being awarded. Grading will be based on the following criteria.

Evaluation	Points
Excellent	90-100 points
Very good	80-89 points
Good	70-79 points
Fair	60-69 points
Fail	Less than 60 points

Advanced Engineering Courses

Advanced Course of Engineering for Innovation

The advanced engineering course is a two-year course. This course was established to provide more advanced technical education for those who have completed a five-year curriculum at the National Institute of Technology (KOSEN). The purpose of the course is to develop an engineer with advanced and wide-ranging knowledge who can contribute widely to industry development. Those who have completed the advanced engineering course can apply for a bachelor's degree under the conditions set by the NIAD-QE. This means that a student who graduates from the advanced engineering course is treated the same as an undergraduate graduate of a university and can apply to a graduate school.

NIAD-QE: National Institution for Academic Degrees and Quality Enhancement of Higher Education, Japan

There are four specialized divisions and five courses in our Advanced Course of Engineering for Innovation. The Advanced Frontier Course develops the education in the Frontier Course of our five-year KOSEN curriculum. In each course, there are subjects to build management skills and specialized and general subjects, including humanities and social sciences. The purpose of the curriculum is to develop an engineer with management knowledge and advanced engineering knowledge. An engineer already working in a company and a foreigner who graduates a KOSEN or similar curriculum can also apply to the Advanced Course of Engineering for Innovation.

Advanced Course of Engineering for Innovation

Division of Mechanical Engineering

- ▶ Advanced Mechanical Engineering Course
- ▶ Advanced Frontier Course

Division of Civil Engineering

- ▶ Advanced Civil Engineering Course
- ▶ Advanced Frontier Course

Division of Applied Chemistry and Biochemistry

- ▶ Advanced Applied Chemistry and Biochemistry Course
- ▶ Advanced Frontier Course

Division of Electronics and Information Engineering

- ▶ Advanced Electronics and Information Engineering Course
- ▶ Advanced Frontier Course

Advanced course admissions policy

The Advanced Course on Engineering for Innovation welcomes students with fundamental expertise in engineering and the capacities listed below.

- Desire for international development via science and technology
- Desire for more advanced skills in related areas of expertise and creative public contribution
- Enthusiasm for advancement in the field of manufacture

The National Institute of Technology's Tomakomai College admissions policy follows an educational philosophy based on fundamental engineering expertise for the advanced course. Focus is placed on academic ability, recommendations, special consideration for working/overseas students toward admission for students with high academic ability, enthusiasm for learning and diverse qualifications.

Advanced course diploma policy

The Advanced Course on Engineering for Innovation is intended to promote the development of rounded characters with broad perspectives, essential skills for technological development based on various viewpoints, cultural appreciation, communication abilities and a spirit of mutual understanding for active interaction worldwide, in addition to expertise in the fields of engineering and management. In this regard, students fulfilling the requirements listed below and obtaining a predetermined number of credits receive certification.

- Collaborative competency for public contribution
- Creative engineering/management expertise application for the public benefit
- Appropriate decision-making and leadership based on character, culture and broad perspectives
- Communication skills for active local and international interaction

Advanced course curriculum policy

In order to develop the skills listed in the Diploma Policy, general subjects designed to help students develop basic academic skills in the natural sciences and humanities, as well as information processing skills, and specialized subjects designed to cultivate students' practical basic skills in mechanical engineering, civil engineering, applied chemistry and biochemistry, electrical and electronic engineering, and computer science and engineering are provided in the professional divisions.

In addition, each professional division is separated into specialized courses and the Frontier Course at the senior year level. The specialized courses will provide specialized subjects for fostering in-depth knowledge of the engineering field, and the Frontier Courses will provide basic business-related subjects for developing a sense of management in addition to engineering knowledge.

1. For the purpose of enabling students to acquire basic scientific knowledge and knowledge of liberal arts which are necessary for practical engineers:

- (1) Natural science subjects such as mathematics, physics and chemistry, and basic information subjects will be provided and developed through a learning method focused on lectures and exercises, so that students can acquire basic scientific knowledge.
- (2) Humanities and social sciences subjects will be provided and developed through a lecture-based learning method, so that students can acquire a broad range of liberal arts.
- (3) In the first year, subjects for introduction to specialties and career education will be provided and developed through a learning method focused on lectures and exercises.

2. For the purpose of enabling students to develop the ability to apply and practice fundamental engineering expertise of each division to social implementation via experiments, training, exercises and practices:

- (1) Specialized subjects corresponding to specialized fields of study will be provided and developed through a learning method focused on lectures and exercises, so that students can acquire fundamental engineering expertise of their division.
- (2) Practical training subjects and subjects conducting problem-solving classes which correspond to specialized fields of study will be provided and developed through a learning method focused on experiments and training, so that students can acquire application and practical skills.
- (3) In senior years, graduation or Frontier research will be provided and developed through a comprehensive learning method.

[Note : Specialized subjects by division]

Mechanical Engineering : Drawing, machine design, mechanics, thermal fluid, machining, materials, information processing, measurement control

Civil Engineering : Surveying, materials, structure, ground, hydraulics, environment, planning, construction, regulations, and drafting

Applied Chemistry and Biochemistry : Organic chemistry, inorganic chemistry, analytical chemistry, physical chemistry, chemical engineering, basic biology, biochemistry, bioengineering, and applied chemistry and biochemistry including functional materials or food chemistry and biochemistry

Electrical and Electronic Engineering : Electrical circuits, electromagnetic, electronic circuits, electronics, electrical power, measurement, control, and communication engineering

Computer Science and Engineering : Programming, software, computer engineering, computer systems, system programs, information and communication networks, information mathematics, information theory, and embedded systems

3. For the purpose of enabling students to develop the ability to understand the true nature of an issue and solve it from proper ethical perspectives:

- (1) Subjects dealing with content related to ethics and engineering ethics will be provided and developed through a lecture-based learning method.
- (2) In senior years, graduation or Frontier studies will be provided and developed through a comprehensive learning method.

4. For the purpose of enabling students to acquire communication skills and the resourcefulness to understand, respect and collaborate with other people:

- (1) Subjects that deepen understanding of behaviors for promoting cooperation and collaboration as a group will be provided and developed through an exercise-based learning method.
- (2) In practical training subjects, a learning method incorporating group work will be developed.

5. International competence and the initiative for ongoing learning

- (1) Foreign language (English) subjects will be provided and developed through a learning method focused on lectures and exercises.
- (2) In senior years, graduation or Frontier research will be provided and voluntary studies and research will be developed.

Policy on grading methods

1. In lecture-based subjects, attainment goals for the subject will be established, regular performance (such as exercises and reports) and results of regular exams will be comprehensively considered, and the level of achievement against the attainment goals will be evaluated.
2. In subjects based on practice, experiments and exercises, regular performance such as assignments, reports and presentations will be comprehensively considered, and the level of achievement against the attainment goals will be evaluated.
3. In the graduation research, papers summarizing research results, presentations, and attitudes toward studies will be comprehensively considered, and the level of achievement against the attainment goals will be evaluated.

Grading and evaluation criteria

Grades are based on a 100-point scale, with 60 points or higher being considered successful and the prescribed credits being awarded. Grading will be based on the following criteria.

Evaluation	Points
Excellent	90-100 points
Very good	80-89 points
Good	70-79 points
Fair	60-69 points
Fail	Less than 60 points

Total	77-80	39-42	38
* Requirements for graduation: 62 credits which must include 10 of general credits, 20 of specialized credits, and 32 of specialized related credits.			

Position	In alphabetical order	Division	The main subjects in its duty	The main research themes
Prof. Dr.Eng.	ABE Tsukasa	Computer Science and Engineering	Fundamentals of Embedded System, Computer Communication, Exercise of Network Programming, Exercise of Real Time Operating System	Computer Communication, Embedded Systems
Assoc. Prof. Dr.Eng.	AKATSUKA Motoki	Electrical and Electronic Engineering	Electric Circuits II, Electric Energy Conversion Engineering, Electric Power System Engineering	Power System, Renewable Energy
Assoc. Prof. Dr.Eng.	ARIMA Takashi	Natural and Physical Science		Nonequilibrium thermodynamics, Theoretical fluid dynamics
Assoc. Prof. Dr.Eng.	ASAMI Hiroki	Mechanical Engineering	Engineering Mechanics I, Creative Engineering III, Machine Design and Drawing IV, Strength of Materials I	Study of hard ceramics material
Assoc. Prof. Dr.Eng.	DOI Shigeo	Computer Science and Engineering	Creative Engineering I, Computer Science and Engineering Systems Engineering, Computer Science and Engineering Laboratory II, Project Management	Swarm Intelligence, Information Systems, Information Security
Prof.	FUJISHIMA Katsuhiko	Natural and Physical Science	Mathematics	Mathematics Education
Assoc. Prof. Dr. Env. Sci.	FUJITA Sayaka	Applied Chemistry and Biochemistry	Creative Engineering II・III, Biochemistry II, Environmental Science, Science of Functional Materials I, Polymer chemistry	Effective Utilization of bioresources
Prof. Dr. Eng.	FURUSAKI Tsuyoshi	Applied Chemistry and Biochemistry	Creative Engineering I, Chemistry II, Inorganic Chemistry III, Science of Functional Materials II	Preparation and properties of functional ceramics
Assoc. Prof. Dr. Info Sci	HARADA Keiwo	Computer Science and Engineering	Creative Engineering I, Programming II, Exercise of Software Design I・II, Computer Science and Engineering Laboratory III・IV	Complex Networks
Prof. Dr. Eng.	HATTA Shigemi	Civil Engineering	Hydraulics I・II, Structural and Geotechnical Engineering	Hydrological Studies in Tarumae volcanic Area, Study on river runoff process
Prof.	HIGASHI Toshifumi	Humanities and Social Sciences	English	Semantics and Pragmatics of English
Prof. Dr. Eng.	HIRANO Hiroto	Applied Chemistry and Biochemistry	Chemistry II, Creative Engineering II, Chemical Engineering II, Chemical Engineering Exercise, Process Design, Process Engineering	Development of high efficient separation unit by use of inclined continuous thickener
Prof. Dr. Eng.	HORI Katsuhiko	Electrical and Electronic Engineering	Electric Circuits I, Control Engineering I, Creative Engineering II, Information Processing Exercise III	Control of autonomous mobile robot
Prof. Dr. Eng.	IKEDA Shin-ichi	Mechanical Engineering	Manufacturing Technology, Machine Design and Drawing I, Creative Engineering II	Cutting of titanium alloy
Prof. Dr. Eng.	INAGAWA Kiyoshi	Computer Science and Engineering	Electronic Engineering, Fundamentals of Hardware, Circuit Theory I・II, Creative Engineering II, Computer Science and Engineering Laboratory I・II・III	Hardware Design, SAW Device Design
Assoc. Prof.	ISHIKAWA Ayumi	Humanities and Social Sciences	English	American Literature
Assoc. Prof. Dr. Eng.	ITO Yoshihiro	Electrical and Electronic Engineering		High speed camera
Prof. Dr. Agr.	IWANAMI Shunsuke	Applied Chemistry and Biochemistry	Applied Microbiology, Food Science, Genetic Engineering, Introduction to Biology and Microbiology, Advanced Course of Biotechnology, Management Exercise, Entrepreneurship Exercise	Research on the food processing and environmental purification of biological function
Assoc. Prof. Dr. Eng.	KANEKO Tomomi	Mechanical Engineering	Engineering Thermodynamics, Thermal Science and Engineering, Advanced Lecture on Environmental Engineering for Cold Region	Thermal energy conversion, Automotive engineering, Gamification
Assoc. Prof. Dr. Eng.	KASHIMURA Nao	Applied Chemistry and Biochemistry	Organic Chemistry I・II・III, Creative Engineering III, Applied Physical Chemistry, Polymer chemistry	Development of up-grading process of organic resources
Assist. Prof. Dr. Earth System Science	KASHIWASE Haruhiko	Natural and Physical Science	Applied mathematics, Mathematics	climate change, Satellite remote sensing
Assoc. Prof. Dr. Eng.	KATO Akira	Civil Engineering	Geotechnical Engineering II, Practice on Surveying I, Civil Engineering Design & Drawing I, Energy outline	Mechanical and mass transport characteristics of recycled aggregate for roadbed materials
Lecturer	KAWANO Tomoya	Humanities and Social Sciences	Japanese	The study of Chinese classical literature in Japan (Focusing on the Heian Period)
Prof. Dr. Eng.	KIKUTA Kazushige	Mechanical Engineering	Engineering Thermodynamics, Thermal Science and Engineering, Advanced Lecture on Environmental Engineering for Cold Region	Thermal energy conversion
Prof. Dr. Eng.	KONDO Takashi	Civil Engineering	Civil Engineering Materials, Structural mechanics I, Surveying I, Highway Engineering	Study on pavement for cold region

Position	In alphabetical order	Division	The main subjects in its duty	The main research themes
Assoc Prof. Dr.Sci	KONNO Kohkichi	Natural and Physical Science	Mathematics	Gravity theory, Astrophysics
Prof. Ph. D. Sci.	KONO Hiroyuki	Applied Chemistry and Biochemistry	Physical Chemistry I・II, Physical Chemistry Exercise, Creative Engineering I, Advanced Course of Physical Chemistry, Polymer chemistry, Management Exercise, Entrepreneurship Exercise	Synthesis and Application of functional polysaccharides
Assoc Prof. Dr.Eng.	KOYABU Eitaro	Mechanical Engineering	Fluid Mechanics I, Creative Engineering II, Machine Design and Drawing IV	Analysis of flow over a turbine blade surface and the high-efficiency of fluid machinery
Prof. Dr.Eng.	KUDO Akihiro	Electrical and Electronic Engineering	Information Processing Exercise II, Creative Engineering III, Electrical Communication I, AI and Data Science I	Binaural sound synthesis
Prof.	MATSUDA Kanaho	Humanities and Social Sciences	English	American Literature
Assoc Prof. Dr.Eng.	MATSUO Yuko	Civil Engineering	Structural Mechanics II・III, Bridge and Seismic Engineering, Coastal and Port Engineering	Maintenance of Structures
Prof. Dr.Info Sci	MIKAMI Tsuyoshi	Computer Science and Engineering	Creative Engineering II・III, Computer Architecture and Organization, Computer Science and Engineering Laboratory II・IV, Digital Signal Processing	Biosignal Analysis, Pattern Recognition
Prof. Dr.Eng.	MITOH Ayumi	Mechanical Engineering	Fluid Mechanic II, Instrumentation Engineering, Engineering Mechanics II, Biomedical Engineering, Fluid Dynamics	Artificial organ, Bioengineering
Prof. Dr.Eng.	MURAMOTO Mitsuru	Natural and Physical Science	Mathematics, Creative Engineering I, Electromagnetic Wave Engineering, Advanced Course of Management I	Electromagnetic Field Analysis, Science Education
Assist Prof.	NAGAO Masanori	Applied Chemistry and Biochemistry	Creative Engineering I・III, Chemistry Laboratory I・II, Advanced Course of Inorganic and Analytical Chemistry, AI Data Science, Inorganic Chemistry II	Synthesis of functional metal oxides for application as a heterogeneous catalyst
Prof. Dr.Sci.	NAGASAWA Tomoaki	Natural and Physical Science	Applied physics, Physics	Elementary particle, Quantum mechanics
Prof.	NAKAJIMA Hiroki	Natural and Physical Science	Physical Education II・III	Studies on ice hockey
Prof. Dr.Eng.	NAKAMURA Tsuneo	Computer Science and Engineering	Programming I, Computer Graphics, Computer Science and Engineering Laboratory I・III, Information Media Engineering	Media Information Processing
Prof. Dr.Eng.	NAKAMURA Tsutomu	Civil Engineering	Geotechnical Engineering I, Surveying I, Practice on Surveying I	Properties of in-soil geogrid deformation
Assoc Prof. Dr.Info Sci	NAKAMURA Yoshihiko	Computer Science and Engineering	Creative Engineering I・II・III, Software Engineering, Database, Computer Science and Engineering Laboratory I・II・III	Medical Image Processing
Prof. Dr. Environmental Earth Science.	NIHASHI Sohey	Mechanical Engineering	Environmental Energy system, Programing, Earth environmental science, Advanced Lecture on Energy Conversion	Ice-ocean system, Earth environment and energy
Lecturer Litt.D.	NOMURA Yuki	Humanities and Social Sciences	History, Geography	History of the Republic of Venice
Assoc Prof. Dr.Eng.	OHASHI Satoshi	Computer Science and Engineering	Creative Engineering I・II, System Software, Computer Communication, Computer Science and Engineering Laboratory I・III	"Medical Image Processing, Biological Analysis, Welfare Engineering"
Prof. Dr.Eng.	OHNISHI Takaomi	Computer Science and Engineering	Logic Circuit I・II, Seminar on Computer Science and Engineering, Computer Science and Engineering Laboratory I・III, Creative Engineering	Instructology and Promoting Formal Method
Assist Prof.	OHSAWA Takuto	Electrical and Electronic Engineering	Electric Energy Conversion Engineering, Electric Power System Engineering	Power System Analysis and Operation
Assoc Prof.	OKUDA Yayoi	Applied Chemistry and Biochemistry	Analytical Chemistry I・III, Creative Engineering II, Chemistry II, Basic Concepts of Analytical Chemistry and Inorganic Chemistry	Chemical characterization of cements and concretes
Assoc Prof. Dr.Eng.	OKUYAMA Yui	Electrical and Electronic Engineering	Electromagnetics I, Electric and Electronics Measurement, Advanced Course of Electronics, Creative Engineering III	Research on discharge plasmas
Assoc Prof.	OSHIMA Kazuhiro	Applied Chemistry and Biochemistry	Instrumental analysis, Chemistry I・II, Organic Chemistry Exercise	Synthesis of new polysaccharide derivatives via "Click Chemistry"
Assist Prof.	SAKAI Yuuma	Civil Engineering	Environmental Engineering I・II, AI and Data Science I (main re)	Mathematical biology, Ecological modeling

Position	In alphabetical order	Division	The main subjects in its duty	The main research themes
Assoc Prof. Dr.Eng.	SASAKI Koji	Electrical and Electronic Engineering	Electromagnetics II, Transmission Line Theory, Digital Circuits, High Frequency Circuits	Speech Signal Processing
Prof.	SASAKI Sai	Humanities and Social Sciences	Politics and Economics, Modern and Contemporary History, Law, Japanese Society and Culture	International Family Law, International Property Law
Assoc Prof.	SATO Nanae	Humanities and Social Sciences	English	EIL (English as an International Language)
Prof. Dr.Eng.	SATO Shin	Applied Chemistry and Biochemistry	Creative Engineering I, Chemical Engineering I, Computer Science I・II, Quality Control, Chemical Engineering Exercise, Process Engineering	Development of new Taylor vortex mixer
Assoc Prof. Dr.Eng.	SAZAWA Masaki	Electrical and Electronic Engineering	Electrical Machinery and Apparatus I, Creative Engineering II, Advanced Course of Electrical Engineering, Applied Measurement Engineering	High speed positroning control Multi degrees of freedom control
Prof. Dr.Eng.	SHITAMURA Mitsuhiro	Civil Engineering	Urban Planning, Infrastructure Planning, Transportation and Traffic Engineering, Landscape Engineering	Characteristics of journey-to-work travel behavior
Assist Prof. Dr.Eng.	SUGIMOTO Masashi	Computer Science and Engineering	Creative Engineering I, Introduction to Data Science, Computer Science and Engineering Laboratory III・IV, Systems Engineering	Soft Computing, Robotics, Internet of Things, LPWA, Communication Network
Assoc Prof.	SUZUKI Shuhey	Humanities and Social Sciences	English	Teaching English as a Foreign Language, Applied Linguistics
Prof.	TADA Mitsuhiro	Humanities and Social Sciences	Public I, Philosophy, Engineer's Ethics, Politics and Economics	Ethics of Schopenhauer, Bioethics
Assoc Prof.	TAGA Ken	Natural and Physical Science	Health, Physical Education	Sports motion analysis, Sports coaching
Prof. Dr.Sci	TAKAHASHI Rohta	Natural and Physical Science	Applied mathematics, Mathematics	Astrophysics, Astronomy
Assoc Prof. Dr.Eng.	TAKAZAWA Kohji	Mechanical Engineering	Engineering Materials I・II, Machine Design and Drawing I, Information Technology	Welding of dissimilar materials, Powder metallurgy
Assist Prof.	TANIGUCHI Yoko	Civil Engineering	Practice on Surveying I・II, Civil Engineering Design and Drawing II, River and Water Resource Engineering	Estimating the amount of water resources for future climate change
Lecturer Litt.D.	TOKITA Saori	Humanities and Social Sciences	Japanese	The study of Woman's literature of the Edo period of Japan
Prof. Dr.Eng.	TOMA Eiji	Mechanical Engineering	Production Engineering, Engineering Quality System, Machine Design and Drawing II, Physical I, Dynamics of Machinery	Optimization study on design and development by "Taguchi method"
Assoc Prof. Dr.Info Sci	TSUCHIYA Yoshio	Mechanical Engineering	Control Engineering, System Control Engineering, Creative Engineering I	Human sensing, Robotics
Assoc Prof. Ph.D	TORITA Hiroyuki	Civil Engineering	Disaster prevention engineering	Natural hazards
Assist Prof. Dr.Sci	UEBA Inori	Natural and Physical Science	Physics	Elementary particle theory
Assoc Prof. Dr.Sci. & Eng.	UTSUNO Kuniharu	Applied Chemistry and Biochemistry	Biology, Biochemistry I, Creative Engineering III, Molecular Biology, Molecular Cell Biology, Introduction to Biology and Microbiology	The study of DNA higher order structure
Prof. Dr.Eng.	YAMADA Akihiro	Electrical and Electronic Engineering	Electronic Device, Electrical and Electronic Engineering Materials, Creative Engineering I	Electric and magnetic properties of electrodeposited thin films
Prof. Ph.D. (Humanities)	YAMAGIWA Akitoshi	Humanities and Social Sciences	Japanese, Chinese	New Confucianism on the Song dynasty
Assist Prof. Ph.D. Information	YAMAMOTO Ryota	Computer Science and Engineering	System Software, Operating System, Creative Engineering I, Computer Science and Engineering Laboratory	Embedded Systems, Software Engineering
Prof. Dr.Eng	YAMASHITA Toru	Natural and Physical Science	Physics, English	Superconducting materials, Electronics materials
Assoc Prof. Dr.Eng.	WATANABE Akio	Civil Engineering	Surveying I, Civil Engineering Laboratory I・II, Reinforced Concrete I・II, Fieldwork I	Material Science

Equipments for main experiment and practical training

Division of Mechanical Engineering

- ▼ 3D cad Design Software Solid Works
- ▼ 3D Printer (STRATASYS Dimension Elite)
- ▼ Precision material-testing machine
- ▼ Universal material-testing machine (Hydraulic type)
- ▼ High speed camera
- ▼ Hydraulic experiment equipment
- ▼ Small channeling-back formula wind tunnel experiment equipment
- ▼ Centrifugal pump module
- ▼ Laser process machines
- ▼ CNC lathe
- ▼ 5-axis machining center
- ▼ Machining center
- ▼ Wire cut electrical discharge machining
- ▼ NC Milling machine
- ▼ FA control learning system
- ▼ Low-temperature wind tunnel experiment equipment (Community cooperative research center installation.)
- ▼ Evaluation system for fuel cell
- ▼ Spark plasma sintering machine
- ▼ Evaluation house for the energy system

▲ 3D Printer

▲ 5-axis machining center

▲ 3D cad design software

▲ FA control learning system

Division of Civil Engineering

- ▼ Hydraulics experimental system
- ▼ Dynamic loading apparatus
- ▼ Independent stress control testing apparatus
- ▼ Multipoint strain digital measurement system
- ▼ Universal testing machine, Compression & bending testing machine
- ▼ Shaking table apparatus
- ▼ Wave flume with absorbing-type wave generator
- ▼ Measurement system of flow velocity (Laser-doppler velocimeter, Total station)
- ▼ Precision thermostatic oven
- ▼ Gyrotory compactor
- ▼ Asphalt pavement analyzer
- ▼ Air supply equipment (ESPEC ASE-200)
- ▼ Electric Muffle Furnace
- ▼ Center cross mixing
- ▼ Concrete specimen grinding machine
- ▼ Bench saw

▲ Civil Engineering Materials

▲ Hydraulics experimental

▲ Practice on Surveying

▲ Compressive strength test

Division of Applied Chemistry and Biochemistry

Laboratory Equipment and Research Facility

- ▼ Nuclear Magnetic Resonance Spectrometer
- ▼ ICP-Mass Spectrometer
- ▼ Atomic Absorption Spectrometer
- ▼ UV-VIS-NIR Spectrophotometer
- ▼ X-ray Diffractometer
- ▼ Scanning Electron Microscope
- ▼ Energy Dispersive X-ray Spectrometer
- ▼ Energy Dispersive X-ray Fluorescence Spectrometer
- ▼ Thermal Analysis Instrument
- ▼ Surface Area and Porosity Analyzer
- ▼ Dynamic Viscoelasticity Measuring Device
- ▼ Universal Testing Instrument
- ▼ Confocal Laser Scanning Micrometer
- ▼ Vacuum Freeze Drying Equipment
- ▼ High-speed Atomic Force Microscope

▲ Nuclear Magnetic Resonance Spectrometer

▲ ICP-Mass Spectrometer

▲ Surface Area and Porosity Analyzer

▲ Clean Bench

Division of Electrical and Electronic Engineering

- ▼ Experimental Equipment for Electromechanical System & Power Electronics
- ▼ Experimental Equipment for Power Semiconductor
- ▼ Experimental Equipment for Wind & Photovoltaic Power Generation
- ▼ The power Transmission System Simulator
- ▼ Experimental Equipment for Robot controller system
- ▼ High-deposition rate equipment and film thickness gauge monitor
- ▼ High Voltage Testing Generator Equipment
- ▼ High Vacuum Drift Tube Chamber Equipment
- ▼ Vacuum Coater Equipment
- ▼ High frequency magnetron sputtering system
- ▼ Vibrating Sample Magnetometer (VSM)
- ▼ Clean Bench
- ▼ Experiment Equipment for Parallel Computing

▲ Experimental Equipment for Electromechanical Systems & Power Electronics

▲ The power Transmission Systems Simulator

▲ High frequency magnetron sputtering systems

▲ High frequency magnetron sputtering systems

Division of Computer Science and Engineering

- ▼ Windows Servers
- ▼ PC-UNIX Servers
- ▼ Personal Computers
- ▼ Software for Computer Engineering Laboratory
- ▼ Arduino Leonard
- ▼ Raspberry Pi
- ▼ LEGO Mindstorms EV3
- ▼ NVIDIA Jetson Xavier NX
- ▼ RX62N Microcomputer Boards
- ▼ Programmable Logic Devices
- ▼ 3D Printer (Raise3D)
- ▼ 3D Scanner (SHINING3D)
- ▼ Servers for AI Experiments (NVIDIA DGX Station A100)

▲ PC-UNIX Servers

▲ LEGO MINDSTORMS EV3

▲ Technology Education Computer Laboratory

Guide of facilities

Library and Information Center

Library and Information Center consists of Three section, Library section, Seminar Room and Information Processing section.

Library

Library has 123 thousand Japanese and foreign books and 1.3 thousand kinds of art and scientific journals.

< Books >											2023.4.1
Classification	General	Philosophy	History	SocialScience	Natural Science	Technology	Industry	Art	Language	Literature	TOTAL
Japanese	7,862	5,034	5,928	9,967	23,300	33,073	1,192	3,128	4,531	17,081	111,096
Foreign	260	409	115	196	5,174	2,898	129	88	1,915	820	12,004
TOTAL	8,122	5,443	6,043	10,163	28,474	35,971	1,321	3,216	6,446	17,901	123,100

< Periodicals >											
Japanese				1,020	Foreign			311	TOTAL		1,331

Library Open to the Public

Library is available for the purpose of learning, research and study.

Everybody can use it by showing your identification to the staff.

Open time : Monday to Friday 8 : 30 ~ 20 : 00

Saturday 8 : 30 ~ 17 : 00 (Open during long vacations 8 : 30 ~ 17 : 00 Closed on Saturday)

Seminar Room

The Seminar Room is equipped with audiovisual equipment such as a large screen and projector.

Information Processing Section

The information processing section is inaugurated, as an institute to contribute for use in information processing education and in educational research of the faculty. And it has played the role of practical use and management of campus network system and educational electronic computer system.

Educational Electronic Computer System

The educational electronic computer system is based on a high-performance education server and a file server for client PCs, with a total of about 100 PC terminals installed in CAI Room 1, CAI Room 2, and practice rooms, and Internet access is also available.

Open time : Monday to Friday 8 : 30 ~ 20 : 00

Saturday 8 : 30 ~ 17 : 00 (Open during long vacations 8 : 30 ~ 17 : 00 Closed on Saturday)

Campus Network System

Campus network system consists of client PC in the headquarters and teachers' the room connected to campus facilities by a Layer3 Switch. Connected to Science Information Network (SINET) via exclusive circuits, it widely enables domestic and international exchange of information via E-mail and the internet.

Career Education Center

Since 2013, the Career Education Center has been established for the purpose of supporting students who try to design their career direction after graduation and preparing to achieve their career goal. In addition to current job hunting and educational advancement support, it also conducts more organized and systematic career education from lower grades in Tomakomai College.

The Center serves the followings

- Daily counseling for career design
- Fostering of students' career awareness
- Planning and conducting career education programs
- Supporting students' search for employment and higher education availability

Community Cooperative Research Center

The Community Cooperative Research Center (CCRC) was established in order to enrich the research activity and the lifelong learning environment in the close cooperation between our college and the local industry, and to support the engineering education.

CCRC is equipped with various experimental devices. With this equipment, CCRC conducts cooperative research, technology development, and material testing/analysis with companies and institutions.

CCRC contributes to local communities through visiting elementary and junior high schools to give science demonstrations. Public lectures and scientific experiment events have also been held.

Collaboration

Collaborative research

We carry out this research with staffs or financial aid from the private enterprises.

Requested research

We carry out this research at the request of private enterprises.

Requested material study

We carry out this study at the request of private enterprises by utilizing the experimental devices in this center.

Consultation for the development of technology

The Community Cooperative Research Center (CCRC) deals with the requests of research from the local industrial world, and also answer questions about collaborative research, accepted research, accepted material study, and external financial aid.

Extension courses

We offer extension courses for elementary and junior high school students in and around Tomakomai City.

▲ Extension courses

▲ Extension courses

▲ Extension courses

Technical Education Support Center

Technical Education Support Center is in charge of various technical supports for students' experiment and training as well as faculty research. It also conducts extension lectures and visiting lessons as regional cooperation activities. Technicians in the center actively participate in technical training seminars and improve their own skills through such staff development.

Technical education support

Experiment / Practice

Extension lectures

Visiting lessons

1. Let's make a super-bouncy ball !
2. Let's make a paper-based LED light !
3. Let's make a mini hovercraft
4. Let's make a perpetual calendar
5. Let's make an original jigsaw puzzle
6. Let's make a comma-shaped gem

▲ Let's make a super-bouncy ball !

▲ Let's make a comma-shaped gem !

Welfare Facilities

Houshou Hall

Houshou Hall was established for the purpose of enhancing the welfare of students, teachers and staff, and enriching the students' extracurricular activities.

▲ Welfare Facilities (Houshou Hall)

Cooperation with the Community and the Local Industry

In order to perform a role as an institution of higher education open to local communities, we offer opportunities for lifelong education to the local residents. We currently visit local schools and hold public lectures and scientific events. In recent years, local industries have asked us for our professional assistance to solve various problems. To fulfill this requirement, the Community Cooperative Research Center provides consultation for technological development at local firms and institutions.

The Association for Tomakomai College

The Association for Tomakomai College was founded in April 1993, for the purpose of forming a close relationship between local industries and our college, promoting our educational and research activities, and contributing to the progress of the community through the assistance for the technological development and the reeducation of engineers of the local industries. Tomakomai Chamber of Commerce and Industry is the liaison office for this association. Currently, about 221 firms in Tomakomai and the neighboring areas hold the membership.

In recent years, the Association have held regular general meetings and job fairs to encourage students to find employment in and around Tomakomai.

The Association has also provided our college with financial support for our education and research.

C-base: Technology Management Consulting Desk

We established C-Base at Tomakomai Economic Center Building on October 12th, 2018. C-base is a satellite office of Tomakomai KOSEN, which provides local companies with consultation about technology management.

Tomakomai city office, Tomakomai Chamber of Commerce and C-base organize a team to help solve the business problems.
